Experiences

Since completing MSc in Kyoto University in 1974 until June 2000, employed by a major Japanese international engineering and construction company. For the first ten years, the main assignments involved project management, i.e., work supervision, cost control, quality control, and schedule control. During last fifteen years, assignments involved mainly contract administration, claim negotiation, and dispute settlement.

In July 2000, established myself as an independent consultant on construction management and dispute resolution in engineering and construction projects, advising owners, contractors, consultants, governmental bodies, manufacturers, insurers and other professionals. Also, have served as Neutral, Arbitrator, Mediator and Dispute Board Member. As of April 2006, became a full time Professor at Kyoto University. Since April 2010, Adjunct Professor at Kyoto University. Serving as Arbitrator for a Nepalese project and a Vietnam project.

Arbitrator

Mediator

Neutral

Serving as Mediator for both Japanese and international commercial disputes.

As DAB Member for a Chinese project and a Madagascar project and as a one-person DRB for a plant operation and maintenance contract

Projects

Hydro (dams, tunnels, underground power stations), process plants, water transmission and treatment systems, roads, bridges, off-shore works, golf courses etc.
